EXECUTIVE SUMMARY

Parent2Child PRO™

Reach for possibilities.

Parent2Child was born out of the need to bridge the gap between parents and their children in school. We wanted to facilitate interaction between all stakeholders necessary for a child's development, as today's parents are usually busy with the task of making ends meet leaving parenting and child monitoring to the school. Parent2Child is simply designed to achieve this, and more importantly also help the school in managing their tasks and routines.

Parent2Child is a school administration software or school management software. Parent2Child is a full-featured web-based software application. It allows schools to easily, and affordably manage student data online. Unlike separate grade book programs, stand-alone course delivery software, and solutions made by "sticking" a bunch of different programs together, Parent2Child is built from the ground up to be a comprehensive and integrated application.

Parent2Child incorporates such features as: full student/course detail setup, flexible attendance system, weighted grades, grade calculator, discipline tracking, internal messaging system, PDF printable multiple custom report card options, custom searches, reports and statistics, user defined list creation, custom access levels and more.

Parent2Child, designed specifically by experienced educators, to meet the hands-on demands of real schools, has a proven track record, it is a web-based alternative to expensive proprietary systems, Parent2Child's has been upgraded again to deliver more user requested functionality while retaining its characteristic ease-of-use.

It is our goal to remain the most cost-effective, full-featured student management system available to schools anywhere. Many alternatives to Parent2Child claim to be web-based, but in reality, they are only web-enabled. What this means is that you still have to run "proprietary" software on certain computers and there are usually some important things that can't be done using a standard web-browser. Parent2Child is 100% web-based. Everything you need to do can be done via a standard web-browser such as Internet Explorer. It is that simple.

As a school, you have the ability to easily configure Parent2Child to fit within your guidelines and practices. For example, you can decide whether parents should be given online access to their son/daughter's information, and if so, exactly what information they should be allowed to view. Software should not dictate how you need to run your school, and that is why we have built Parent2Child to be as flexible as possible.

Since smoothcartoonsnigeria, the developers of Parent2Child, have written the entire code from the ground up, if there are additional features you wish to incorporate or custom changes you would like to have, we will do our best to accommodate. Parent2Child works as an "out-of-the-box" application, but we are more than happy to provide free quotations for any special requests you may have. We also offer a range of optional services to help you get up and running quickly.

Parent2Child provides simple access to all important school information, which allows you to make knowledge-driven decisions. We invite you to learn more about Parent2Child by exploring our brochure. Please contact us if we can be of further assistance.

FEATURES

- Teachers, Principal, HouseMasters, Parents, and Administrators each get their own personal login into Online Grades, which allows them to see all of the grades in all of their classes.
- An unlimited number of administrators, teachers, and parents in your school community can access Parent2Child 24-hours a day for no additional cost
- If parents have more than one child at a school or district, they only need one parent login to see the grades of all of their children.
- Offline & Online Gradebook
- A Transcript System to print student transcripts
- Report Card System to generate professional looking report cards.
- Data integrity using secured locking/unlocking of student grades
- Financial system that has the ability to compute total amount paid and owed by a search group. The financial system also has the ability to print pdf invoices.
- Subject/course & class management with teacher allocation
- Automatic Results Calculation (GPA or Percentage System)
- Automated Principal Comments & Signatures
- Batch Grade scores Processing
- Electronic Report card/transcripts that can be mailed to parents on the fly.
- Guaranteed ROI by generating revenue through the parent portal by selling this service to parents at an annual fee determined by your school.
- Ability to assess a child's academic records in class, and generate detailed performance reports to give you valuable insight about the child's abilities
- Supports a paperless environment that meets expectations of the 21st century
- Ease of use - No programming skills required (not even HTML)
- It has a built-in security facility to check unauthorized access, including separate access levels. No programming knowledge needed and only a few mouse clicks are required.

INTRODUCTION

Parent2Child PRO™

Reach for possibilities.

Parent2Child™ IN DETAIL

Parent2Child™ is an Information Management tool, specially designed for Nursery to Secondary Schools. It provides simple interfaces that allow data input, storage, processing (edit and updates) and formatting, with several reports that are fully customizable to suit each school's model of data acquisition, storage and retrieval. Since different schools employ different methods and forms of data formats, Parent2Child™ at present will be modified to meet all your expectations, as it will be customized to suit your school's administrative desires.

FUNCTIONALITIES

- **COMMUNICATION:** Administrators, teachers, staff, parents all use the same interface, the same database and the same data, Parent2Child™ includes a parent portal that allows parents to check and print data information & charts on their child's performance, academic reports, attitude and more from anywhere using the same intuitive web interface. And it is part of the base solution, which is free.
- **ACCURATE AND INSTANT COMPUTATION OF RESULTS:** Using mathematical and logic functions, Parent2Child™ electronically undertakes results-processing tasks effectively and efficiently.
- **SMS TEXT MESSAGING:** Parent2Child™ also integrates SMS Text Messaging for communicating with stake holders. School closing? Weather alert? Important announcements? Crisis situation? Quickly and easily notify teachers, staff and parents.
- **INTERESTING PRINT FUNCTIONS:** Parent2Child™ offers provision for printing of various formats of information, ranging from results (termly, class, sessional results), broad sheets, master sheet generation, best performances, students' lists, statistical summaries, class lists, attendance sheets to staff designation, amongst a few!
- **CENTRAL ADMINISTRATION:** Unlike many solutions in the market, Parent2Child™ is a centralized relational database eliminating the need for servers in individual schools. This increases security and reduces costs associated with maintenance as compared to distributed systems that requires a server in every school, experience real savings by centralizing your entire application. Reduce your hardware costs and staff costs associated with maintaining those servers.
- **100% WEB BASED SOLUTION:** No need for client software, Any industry standard web browser will work. Increases productivity and morale through anytime, anywhere access. Have a system that requires a desktop client to be installed? Have many desktops? All of these have to be maintained by IT. Reduces costs of maintaining the desktop by eliminating maintenance associated with upgrades and patches to rich clients.
- **USER-FRIENDLY INTERFACES –** An intuitive interface and logical workflows make Parent2Child™ exceptionally easy to use, Less training, faster staff adoption rates and easy administration ensure Parent2Child™ is working for you. The interfaces used in the application require little or no training at all! (our list of existing customers can testify to that)
- **INTERNET BASED SOLUTION –** Can you surf the web? You can use Parent2Child™ ! Point and click navigation, Parent2Child™ is a web-hosted portal solution allowing all personnel access to student & staff information anywhere, anytime as long as there is internet facility.

FUNCTIONALITIES

- **DATA SEARCH ENGINE** – Parent2Child™ is equipped with very powerful and capable search engines which speed up search and retrieval of information based on user-supplied criteria. These data can be exported as Microsoft excel to facilitate custom report instead of the in built report that comes with Parent2Child™ .
- **SIGNATURE CAPTURE** – Parent2Child™ allows the signatures of proprietors/school owners & accounting officers to be captured and placed automatically on important reports concerning students e.g Payment receipt, report card, certificates etc. as generated by the solution.
- **BILLING** – Parent2Child™ is suitable for handling all payments as regards the student keeping school wide relevant information on various payments and generating audit trail on all transactions with comprehensive financial reports, payment receipt, class payments reports etc.
- **SECURITY** – Parent2Child™ has built-in security facility to check unauthorized access, including separate access levels. No programming knowledge needed and only a few mouse clicks are required.
- **DATA LOCKING/UNLOCKING** – Parent2Child™ also has an inbuilt function to lock data (students grade scores) preventing teachers & staffs from manipulating such data in future without the express permission of the administrator. This feature prevents fraud and conival between teachers and any other concerned party.
- **PARENT PORTAL** – Parent2Child™ includes a parent portal that allows your parents to see their children grades, attendance, discipline and more using the same intuitive web interface. And it comes with the base solution which your school can turn into a value added service for revenue generation.
- **INFORMATION MANAGEMENT SYSTEM** - Parent2Child™ also serves as an a platform to keep a central information of teachers, students & parents details for easy retrieval and decision making.

CORE MODULES

Administrator

- Academic Calendar
- Time-tables
- Billing/Fees management and financial reports
- SMS Notifications/E-mail
- Generate Various Reports
- Course setup/Subject teacher allocation
- Student/parents/teachers information management
- Signature capture
- Class management
- Data Export to Excel format

Administrator Module

Is used for configuring and managing all students, teachers, parents & school wide settings and configurations.

Course Management Module

Is used to setup courses' details and associate them with their corresponding classes for a given session also configure maximum scores for CA, Test, Exam units. This module is also used to assign Lecturers to Courses they are to handle, view & manage results associated.

Payment Module

Allows administrators to configure payment templates by adding, editing or deleting payment items. Once these templates have been defined, they can be applied to specific students or set of students based on the student class genre/boarding or day. The module allows for flexible reconfiguration of payment templates per session. It can be used to track payments and history of such payments made.

Messaging System Management Module

This module is used to configure automated comments & messages for grade marks and general notifications on report cards this includes SMS /Email Alerts e.g. Automated principal comments based on grade performance & parent-child SMS/Email alert notifications.

Security and Audit Module

Allows administrators to check modules that are been audit trailed. Audit Reports logs can also be generated on who performed an action and on whom it was performed.

Result Processing Module

Allows marks to be recorded while the system automatically applies the corresponding marks grade and grade class based on the grading system configuration. Results are finally confirmed and approved so that it could be published for parents to see.

Principal & Teacher

- Teachers' grading online /offline
- Comments on academic performance
- Enter attendance details
- Behavioural pattern
- Psychometric Information
- Cognitive Traits

Parent

- Parents are able to interact with subject teachers on child performance etc.
- View academic charts
- School calendars
- Notifications and Announcements
- Performance charts on children
- Character trait reports of their child
- Print report cards, attendance etc
